

**WHAT IS CLAIMED IS:**

1. A cosmetics container, comprising:
  - a main body; and
  - a top cover mounted on the main body and having a bottom wall
- 5 provided with a reflective face directed toward the main body to produce an optical reflective effect.
2. The cosmetics container in accordance with claim 1, wherein the main body is made of transparent material.
3. The cosmetics container in accordance with claim 1, wherein the  
10 main body is made of translucent material.
4. The cosmetics container in accordance with claim 1, wherein the main body has an inside formed with a receiving space containing cosmetics therein.
5. The cosmetics container in accordance with claim 1, wherein the  
15 main body has top face provided with a stepped annular protruding flange extending upward therefrom, and the top cover has a bottom face formed with a circular mounting recess to receive the protruding flange of the main body.
6. The cosmetics container in accordance with claim 5, wherein the protruding flange of the main body has an outer periphery provided with a  
20 plurality of equally spaced inverted L-shaped snapping plates, and the mounting recess of the top cover has an inner periphery provided with a

plurality of equally spaced rectangular locking blocks each snapped into a respective one of the snapping plates of the protruding flange of the main body.

7. The cosmetics container in accordance with claim 5, wherein the mounting recess of the top cover has a bottom wall provided with the reflective

5 face.

8. The cosmetics container in accordance with claim 5, wherein the reflective face of the top cover has a periphery provided with a stepped edge rested on the protruding flange of the main body.

9. The cosmetics container in accordance with claim 8, further  
10 comprising a colored plate bonded on a surface of the stepped edge of the mounting recess of the top cover and located under the reflective face of the top cover.

10. The cosmetics container in accordance with claim 9, wherein the colored plate is a circular plate having a single color, multiple colors or laser  
15 patterns.

11. The cosmetics container in accordance with claim 9, wherein the colored plate is an annular plate having a single color, multiple colors or laser patterns.

12. The cosmetics container in accordance with claim 1, wherein the  
20 top cover is made of transparent material.

13. The cosmetics container in accordance with claim 1, wherein the top cover is made of translucent material.

14. The cosmetics container in accordance with claim 1, wherein the top cover has a top face provided with a multi-angled refractive face.

15. The cosmetics container in accordance with claim 1, wherein the top cover has an inner side provided with a convex lens.

5        16. The cosmetics container in accordance with claim 1, wherein the reflective face of the top cover has an inner side provided with a convex lens.
